German Road Safety - By Bike

<https://www.germanroadsafety.de/compact-guide/en/k3.html>

TWO EASY WAYS TO BE A SAFER BICYCLIST

- Wear the Proper Gear:** Wearing a bike helmet and other safety gear reduce the severity of bike injuries, especially head injuries. Additionally, wearing bright clothes and reflective materials will alert vehicles of your presence in the mornings and evenings as well as on cloudy days.
- Follow the Rules of the Road:** Following the rules of the road means that you need to obey all traffic laws as well as signaling at the appropriate times.

BIKE HELMETS
Bike helmets reduce the risk of head injuries by up to 88%. Cyclists who do not wear helmets are 2.3 times more likely to sustain a head injury and 4.3 times more likely to sustain a fatal injury.

COMMON BIKE INJURIES
Road Rash
Muscle Sprains and Strains
Fractures and Broken Bones
Concussion
Head and Brain Injuries

STATISTICS

Biking is a great way to get in shape, save money on transportation, or just enjoy the great outdoors. Unfortunately, every year thousands of people are injured and hundreds of people are killed while riding bicycles.

More than 67 million people ride almost 15 billion hours each year in the United States. Bicycling is the cause of the most head injuries out of any sport. In 2009, bicycling caused about 88,000 head injuries and more than 40,000 head injuries in children.

40,000 head injuries to children

Every year more than 500,000 people go to the emergency room with bike injuries and over 700 people die.

\$\$\$\$\$ 4 Billion

These bike injuries and deaths cost over \$4 billion each year.

RIDERS AREN'T ALWAYS IN THE RIGHT. BUT THEY ARE ALWAYS FRAGILE.

Take the high road and give bicyclists the space they need to ride safely. Check our website for more road sharing tips.

Sun Protection, Your Daily Sun Protection Guide

<https://www.skincancer.org/skin-cancer-prevention/sun-protection/>

Skin Cancer and Sun Safety

https://www.cdc.gov/cancer/skin/basic_info/sun-safety.htm

SAY YES TO SUN PROTECTION
SAY NO TO SKIN CANCER

SKIN CANCER IS THE MOST COMMON CANCER IN THE U.S.
ONE in FIVE Americans will develop skin cancer in their lifetime, and one person dies from melanoma, the deadliest form of skin cancer, every hour.

THERE ARE TWO TYPES OF SUNSCREENS:

PHYSICAL SUNSCREEN

This sunscreen **WORKS LIKE A SHIELD**. It sits on the surface of your skin, deflecting the sun's rays.

- SEEKING SHADE
- WEARING PROTECTIVE CLOTHING
- GENEROUSLY APPLYING SUNSCREEN

CHEMICAL SUNSCREEN

This sunscreen **WORKS AS A SPONGE**, absorbing the sun's rays.

Look for one or more of the following active ingredients: **OXYBENZONE, AVOBENZONE, OCTISALATE, OCTOCRYLENE, HOMOSALATE and OCTINOXATE.**

This formulation tends to be **EASIER TO RUB INTO** the skin without leaving a white residue.

Since exposure to the sun's harmful UV rays is the most preventable risk factor for skin cancer, protect your skin by:

If you have concerns about certain sunscreen ingredients, use the information above to choose an alternative that works for you. As long as its **BROAD-SPECTRUM, WATER-RESISTANT** and has an **SPF 30 OR HIGHER**, it can effectively protect you from the sun. Make sure you reapply it every **TWO HOURS**, or after swimming or sweating.

If you have questions about how to protect your skin or choose a sunscreen, talk to a board-certified dermatologist or learn more at SpotSkinCancer.org.

Sun 101

Know The Basics

- ✓ Choose a sun care product with an SPF that meets your needs.
- ✓ Look for sun care products labeled Broad Spectrum or UVA/UVB which provide adequate protection against the sun's harmful rays.
- ✓ Regardless of SPF level, be sure to reapply every two hours or as directed on the package.

Hours in the Sun	Skin Tone				
	Very Fair	Fair	Light	Medium	Dark
1	SPF 30	SPF 15	SPF 15	SPF 8-14	SPF 8-14
2	SPF 30	SPF 30	SPF 30	SPF 15	SPF 15
3	SPF 50	SPF 50	SPF 30	SPF 30	SPF 15
4	SPF 50-110	SPF 50-110	SPF 30	SPF 30	SPF 15
5	SPF 50-110	SPF 50-110	SPF 50-110	SPF 50	SPF 30
